OUR STORY BEGINS: A LETTER FROM THE FOUNDERS

Michael Ali
Director

Gabriela Sewdhan
Director

At Scarlet Creative, we believe technology should not just build systems, it should build hope. We started this journey in October 2021 with a promise to ourselves: **create technology that protects, uplifts, and heals, not just scales.**

We partner with **businesses, NGOs, and impact-driven organisations** that share a vision of progress rooted in humanity. Whether it's AI and automation for growing companies or digital platforms serving vulnerable communities, our compass remains the same: **empathy first, impact always.**

From initiatives like **Tee4Humanity**, turning art into real-world change, to future dreams like **building an animal sanctuary and supporting grassroots heroes**, our purpose goes beyond code, it's about compassion in action.

Scarlet Creative is more than a tech company. It is a promise to build a kinder future, where innovation serves people first.

Thank you for walking this journey with us! Whether you are a visionary founder, a global change-maker, or a community builder. **Let's create solutions together!**

—
Michael and Gabriela
Co-founders of Scarlet Creative

WHO WE ARE

Our Vision

To be a trusted technology partner for organisations that want to grow without losing their humanity, where reliable digital systems support both strong operations and positive social impact.

Our Mission

We design and build human-centred software, automation, and data systems that:

- Reduce repetitive, manual work
- Give leaders clear, timely visibility
- Make services more accessible to underserved communities
- Support ethical, transparent, and sustainable operations

Success for us means more time, clarity, and capacity for the people using our tools.

What We Believe In

Helping Others - We serve everyone, ensuring technology is accessible and beneficial to all.

Impact - Technology should make a concrete difference: less friction, better outcomes.

Clarity - Plain language, honest expectations, and tools that people actually understand.

Craft - Clean architecture, thoughtful UX, and maintainable systems that can grow.

Trust - We show up consistently, honour commitments, and build systems you can rely on.

Partnership - We co-create with our clients, sharing responsibility for long-term success.

WHAT WE DO

Our Toolkit for Change: Our Services

We turn scattered tools and manual processes into connected, intelligent systems.

Custom Software & Application Development

Web and mobile applications tailored to your programmes and operations, from portals and internal tools to full platforms for registration, tracking, and reporting.

AI & Decision Support

AI assistants and analytics layers that help teams search, summarise, and understand their own data – in plain language – without needing a technical background.

Business Systems & Integrations (Odoo, ERPs & More)

Integrations between ERPs, CRMs, registration portals, and finance tools so product, project, and client data stays consistent across your ecosystem.

Automation

We map your processes, then automate where it's safe and useful: routing submissions, syncing data between systems, and sending notifications so nothing falls through the cracks.

Data, Dashboards & Impact Measurement

Structured data models, dashboards, and reporting pipelines that turn raw information into clear insight for management, regulators, and funders.

UI/UX Design & Consultation

Human-centred design, UX reviews, and product consulting to make complex systems feel intuitive, especially for non-technical staff and external stakeholders.

WHO WE ARE

The Minds Behind the Mission

*We're a human-centred, collaborative team rooted in the Caribbean.
We value learning, clear communication, and sustainable, long-term partnerships.*

FOUNDER, DIRECTOR & LEAD SOFTWARE ENGINEER
(SYSTEMS INTEGRATION, DEVOPS, ARCHITECTURE)

Michael Ali

Michael is Scarlet Creative's **"big-picture"** architect, focused on **turning complex operations into clean, reliable systems**. He **leads the engineering direction** and brings calm structure to delivery, integrations, and scalability decisions.

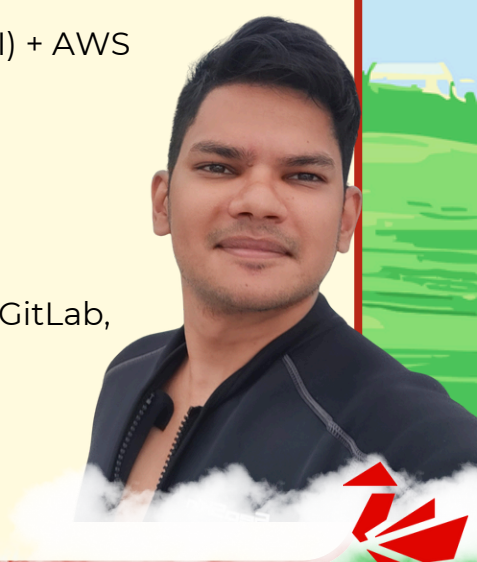

Focus areas

- Systems integration and solution architecture
- DevOps-minded delivery: reliability, automation, clean deployments
- Building foundations teams can confidently ship on

Toolbox Highlights:

- **Languages:** Python, NodeJS, TypeScript
- **Data systems end-to-end:** ingestion (APIs/scraping/OCR), transformation (pandas/ML), storage (SQL/NoSQL, Elasticsearch, BigQuery), dashboards/chat interfaces
- **Cloud + platforms:** GCP (Cloud Functions, GKE, Vertex AI) + AWS (EC2, Lambda, S3)
- **DevOps / MLOps:** Docker, Kubernetes, CI/CD, serverless patterns
- **Frameworks + integration tooling:** FastAPI, React, Vue, Streamlit/Reflex, Selenium, Puppeteer, Make, Zapier, Git/GitLab, JIRA; plus Tableau for KPI dashboards

[LinkedIn Profile](#)

DIRECTOR & LEAD DESIGNER
(DESIGN DIRECTION, STORYTELLING, PRODUCT FEEL)

Gabriela Sewdhan

Gabriela is Scarlet's creative heartbeat, shaping **how your products feel and how your story lands**. Her work blends careful detail with clear communication, **helping teams translate ideas into experiences** people actually want to use.

Focus areas

- Product/UI & UX design direction and visual storytelling
- Graphic Design
- Motion Design & Animation
- Human-centered design choices that reduce friction
- Crafting clarity: making complex systems feel approachable

Toolbox Highlights:

- **Design / storytelling tools:** Canva, Figma, Adobe Photoshop, Adobe Illustrator
- **Motion Design tools:** Rive, Adobe AfterEffects
- **Systems / Backend:** Python, JavaScript, REST APIs, SQL (PostgreSQL/MySQL), Firebase/Firestore, Google Cloud Functions, serverless, webhooks
- **Frontend / UX Engineering:** ReactJS, Next.js, Flutter, responsive design, accessibility (a11y), UX prototyping
- **Data:** Pandas, NumPy, scikit-learn, Plotly
- **Automation platforms:** Zapier, GoHighLevel, WordPress/Wix/Squarespace, Git/GitHub, Google Cloud

Portfolio Link

TECH LEAD & UI/UX DESIGNER
(FULL-STACK + PRODUCT UI
LEADERSHIP)

Kyle Awah

Kyle bridges **product design and engineering, leading UI decisions while also shipping full-stack work.** He's held senior responsibilities across operations, client communication, hiring, team leadership, and product delivery, and has led UI design across Scarlet's software efforts.

Focus areas

- Product UI/UX leadership (including accessibility training)
- Full-stack web + cross-platform app delivery (web, mobile, cloud)
- Release planning, task breakdown, and internal leadership support

Toolbox highlights

- **Frontend & Mobile:** Vue.js, Flutter, SwiftUI
- **Backend & APIs:** Python (FastAPI, Flask), REST API design + cloud deployment
- **Cloud:** AWS + GCP (deployment experience referenced in training)
- **Data / AI:** Python + deep learning + data visualisation (Kaggle certs)
- **Also in his broader kit:** Nuxt, Tailwind CSS, Postgres, Streamlit, WebFlow, Wix, WordPress, Figma (and a long list of supporting tools)

Portfolio Link

SOFTWARE DEVELOPER / QA & TESTING
SPECIALIST (QUALITY, DEPLOYMENT
PIPELINES, PERFORMANCE)

Jonathan Rampersad

Jonathan sits at the quality gate and keeps it friendly but firm. He combines **dev support with QA/testing, CI/CD awareness, and performance-minded improvements**, helping teams ship changes with fewer surprises and smoother rollouts.

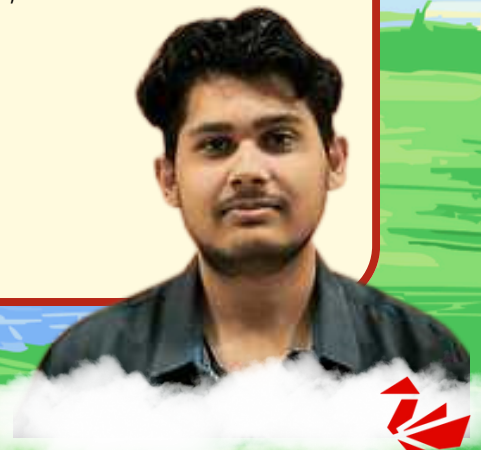

Focus areas

- DevOps
- Backend Development
- QA/testing and reliability improvements (reduced incidents, faster load times)
- CI/CD and cloud deployment workflows (Docker, GitHub Actions, Cloud Run)
- ERP customisation (Odoo 17/18 modules tuned to real workflows)

Toolbox Highlights

- **Languages:** Python, C++, JavaScript
- **DevOps:** Docker, GitHub Actions (CI/CD), Linux/Ubuntu
- **Cloud:** Google Cloud Run, Firebase, Python Cloud Functions
- **Automation:** Zapier, n8n, custom Python scripts
- **Business systems:** Odoo 17/18 custom modules; Cloudflare Workers/Tunnels & domain tooling

Portfolio Link

SOFTWARE DEVELOPER (AUTOMATION, CLOUD FUNCTIONS, INTEGRATIONS, CRM WORKFLOWS)

Sanjeev Praboocharan

Sanjeev is a builder who likes systems that **“talk to each other.”** He works across **CRM platforms and automation tools, shipping practical workflows that connect data, reduce manual work, and keep operations moving.**

Focus areas

- Ruby, Ruby on Rails
- Full-Stack Development
- CRM and automation systems (GoHighLevel, Salesforce, Kajabi)
- Google Cloud Functions and workflow automation support
- Zapier + Google Apps Script integrations for data and process automation

Toolbox Highlights:

- **Web / Backend:** JavaScript, HTML/CSS, C# foundations, Ruby + Ruby on Rails, ASP.NET/Web API exposure
- **DevOps:** Docker + Kubernetes foundations
- **CRM + automation:** GoHighLevel, Salesforce, Kajabi; Zapier + Google Apps Script automations
- **Cloud:** Google Cloud Functions used to support workflow automation

LinkedIn Link

SOFTWARE ENGINEER (DATA MOVEMENT, REPORTING, INTERNAL TOOLING)

Richard Rattansingh

Richard focuses on **practical engineering**: building internal, practical, data-backed software that turns operational needs into working tools, especially where automation, reporting, and reliability matter. He's great at:

- **Building internal web tools** that make data easier to move, trust, and use
- Shipping features with a **"clean outputs" mindset** (reports, dashboards, PDFs, exports)
- **Bringing structure to messy inputs** and **turning them into usable systems**

Focus areas

- Data upload/processing workflows and report generation
- Web app development with ASP.NET/C# and dynamic PDF outputs
- Building clean operational tooling that reduces manual overhead

Toolbox Highlights:

- **Web apps / automation:** n8n, Make, Zapier, GoHighLevel, ASP.NET + C# + JavaScript (including dynamic PDF report generation + email delivery)
- **Data tooling mindset:** automated upload pipelines + reporting workflows (insurance data ingestion + report generation)
- **Dev tools:** Trello, Git/GitHub, Docker
- **Cloud:** AWS/Azure/GCP project delivery concepts

LinkedIn Link

Brittney Dhanoo

Brittney blends **practical software development with a designer's sense of structure and flow**. She supports Scarlet by **building and refining web experiences, shaping UI/UX for clarity and ease, and contributing to systems work where front-end, data, and business operations meet**. She's comfortable jumping between **interface design, implementation, and troubleshooting**, which makes her especially useful on projects that need both polish and problem-solving.

Focus areas

- Administrative support + data accuracy (records, logs, reporting)
- Odoo ERP operations and module updates (XML + Python)
- Supporting validation and user-level testing of features

Toolbox highlights

- **Business systems:** Odoo ERP (operations + module support)
- **Languages:** JavaScript, Python, Java, C#, XML, SQL, HTML, CSS, React
- **Hands-on dev support:** XML + Python module updates, troubleshooting, linking technical changes to ops/data quality
- **Design:** Canva, Adobe Illustrator, Photoshop, Figma

LinkedIn Link

WHAT WE USE

OUR TECH EDGE

Modern, reliable engineering focused on real-world operations.

HOW WE BUILD

- **Agile delivery** – Short iterations, regular demos, and close collaboration with stakeholders so we can adjust early and often.
- **DevOps & Reliability** – CI/CD pipelines, logging, and monitoring so changes are tested, releases are repeatable, and systems stay stable.
- **Security & Data Care** – Role-based access, encryption where appropriate, and careful handling of sensitive information in line with best practices.

WHAT WE USE

We work with a modern, practical stack, including:

- **Languages & Frameworks** – JavaScript/TypeScript, Python, PHP, Dart, SQL/NoSQL; React, Vue, Next.js, Flutter.
- **Cloud & Infrastructure** – Google Cloud Platform, AWS, serverless functions, containerised workloads, and CI/CD tooling.
- **Databases** – PostgreSQL, MySQL, MongoDB, Firestore, and analytics warehouses where needed.
- **Automation & Integrations** – n8n, Zapier, Make, custom APIs, webhooks, Google Cloud Functions, Twilio, and more.
- **Business Systems** – Odoo ERP, CRM and project tools, accounting and payment platforms commonly used by our clients.

We choose technologies based on fitness for purpose, maintainability, and what your team can realistically support over time.

OUR MARKET FOCUS

Where our experience is strongest

We work best with organisations that manage many moving parts, people, products, projects, and data, and need systems that bring it all together.

PUBLIC & SOCIAL IMPACT ORGANISATIONS

Standards bodies, NGOs, and development partners that require registries, monitoring tools, and clear reporting to stakeholders.

CONSTRUCTION & HOME SERVICES

Field operations platforms, scheduling, and document workflows for companies coordinating crews and projects at scale.

EDUCATION & TRAINING PROVIDERS

Online learning, enrolment, certification, and automated reporting to regulators and partners.

ENERGY, SOLAR & TECHNICAL SERVICES

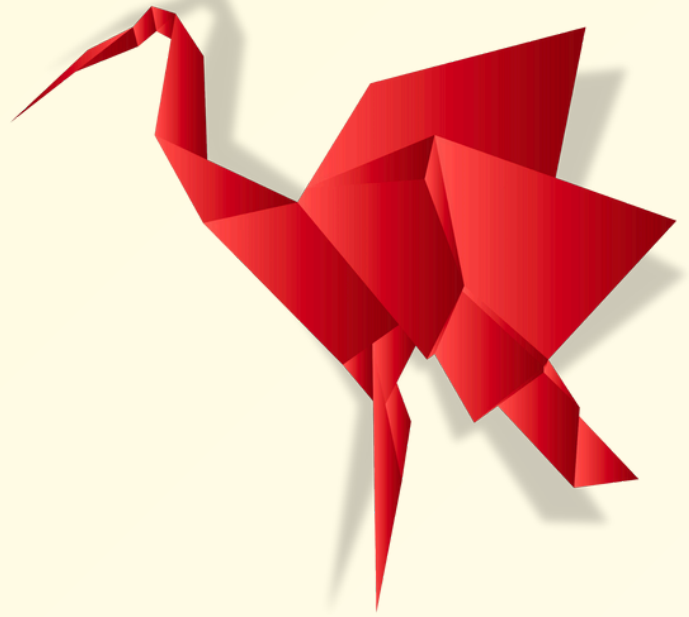

Integrations between design platforms, ERPs, and finance systems for projects that have strong technical and regulatory requirements.

HEALTHCARE & PROFESSIONAL SERVICES

Scheduling, case or client management, and secure data flows between front-line teams and back-office systems.

Across these sectors, our focus is consistent: reduce manual work, improve visibility, and support better decisions for the organisations we serve.

TECHNOLOGY WITH A CONSCIENCE

GET IN TOUCH

Let's Create Change Together

Whether you're a mission-led organisation or a growing business, if our values resonate, we'd love to create impact together.
