

SCARLET CREATIVE SOFTWARE

OUR CURRENT MANAGED SOLUTIONS

Tech Stack

- **Frontend:** Vue 3
- **Backend:** Google Cloud Functions (microservice architecture)
- **Integrations:** Zapier, Email Services, Webhooks, REST APIs

What It Does

- No-code / low-code form builder for field data capture
- Supports complex workflows, validations, and conditional logic
- Seamlessly pushes data into external systems via integrations

Problems It Solves

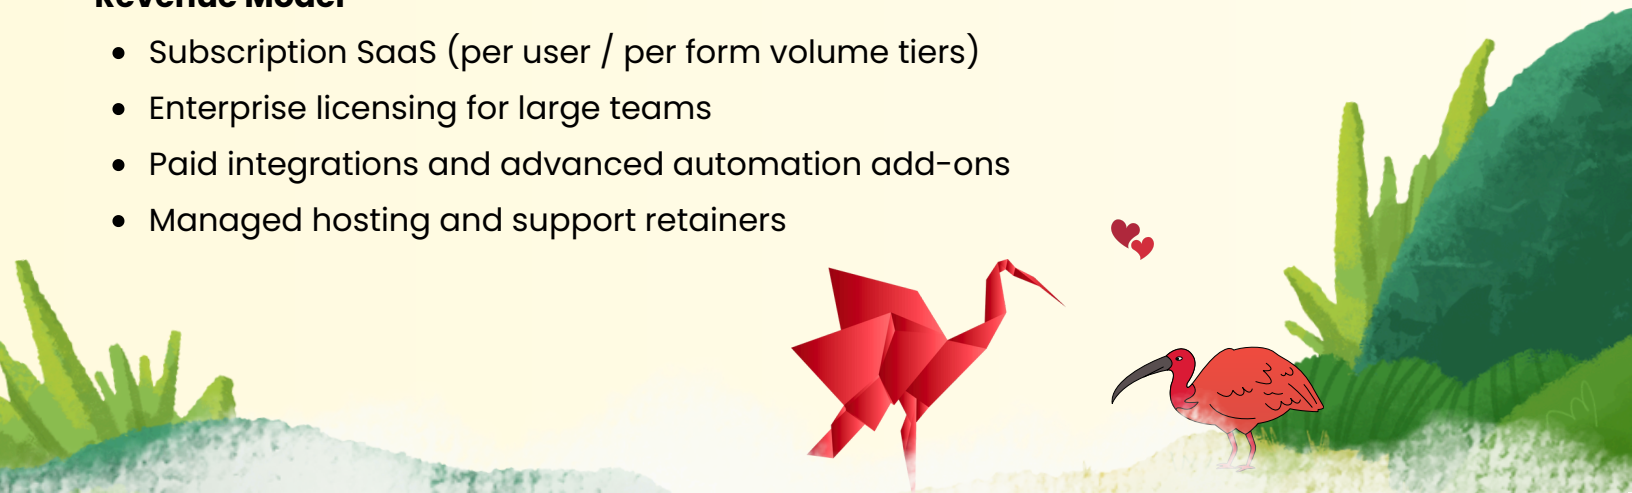

- Replaces rigid, siloed form tools with a flexible, integration-first platform
- Eliminates manual data entry and disconnected workflows
- Reduces operational friction for mobile and field teams

Target Customers

- Construction and installation companies
- Field service businesses
- NGOs and data-collection teams
- Enterprises replacing paper or legacy form systems

Revenue Model

- Subscription SaaS (per user / per form volume tiers)
- Enterprise licensing for large teams
- Paid integrations and advanced automation add-ons
- Managed hosting and support retainers

Tech Stack

- **Frontend:** Flutter (cross-platform mobile and web)
- **Backend:** Google Cloud Functions (microservices)
- **Integrations:** Salesforce, Google Calendar API, Twilio API

What It Does

- Syncs Salesforce installation jobs into installers' personal calendars
- Allows customers to select and confirm appointment slots
- Sends automated reminders before appointments
- Provides KPI dashboards for operations and performance tracking

Problem It Solves

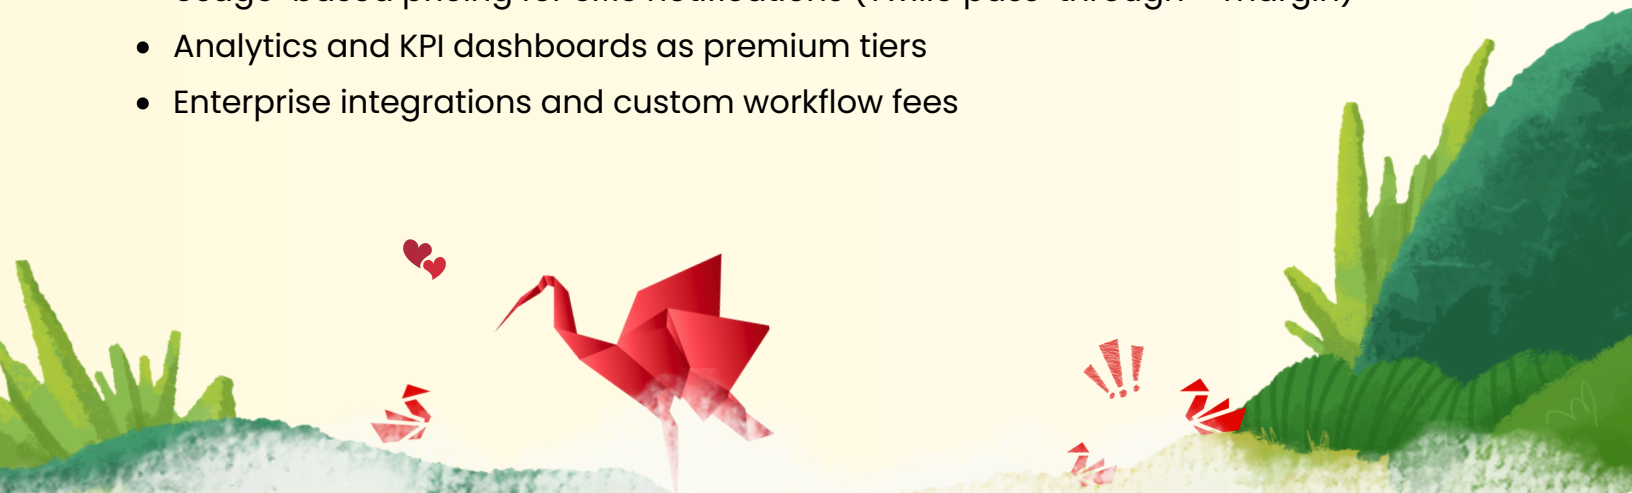

- Eliminates missed appointments and scheduling conflicts
- Reduces manual coordination between sales, installers, and customers
- Improves customer experience with proactive communication
- Gives management real-time visibility into field performance

Target Customers

- Home services companies (roofing, windows, HVAC, solar)
- Installation-based businesses using Salesforce
- Operations teams managing distributed field workers

Revenue Model

- Per-installer or per-seat monthly subscription
- Usage-based pricing for SMS notifications (Twilio pass-through + margin)
- Analytics and KPI dashboards as premium tiers
- Enterprise integrations and custom workflow fees

Tech Stack

- **Frontend:** Flutter
- **Backend:** Microservice architecture (cloud-native)
- **Payments:** Integrated payment gateways with escrow services
- **Security:** KYC verification and compliance workflows

What It Does

- Multi-vendor e-commerce marketplace for products and services
- Connects customers to verified businesses and service providers
- Supports escrow-based payments to reduce fraud
- Advanced discovery via filters, featured listings, and popularity ranking

Problem It Solves

- Reduces scams and trust issues in local online marketplaces
- Gives small businesses a secure, ready-made digital storefront
- Simplifies service discovery for customers across industries
- Centralises payments, trust, and logistics in one platform

Target Customers

- Small and medium-sized businesses
- Independent service providers (plumbing, electrical, construction)
- Distributors and local retailers
- Consumers seeking trusted local services

Revenue Model

- Transaction fees on completed sales
 - Subscription plans for vendors (basic vs featured visibility)
 - Featured listings and promotional placements
 - Escrow and payment processing service fees
-
